

Appin. No. 10/783,456

Attorney Docket No. 11663-013

**II. Remarks**

Reconsideration and re-examination of this application in view of the above amendments and the following remarks are herein respectfully requested.

Upon entry of the above amendments, claims 10-15 are pending in the application.

**Rejections Under 35 U.S.C. § 102**

Claims 10-12 were rejected under 35 U.S.C. §102(a) as being anticipated by U.S. Patent No. 5,507,999 issued to Copsey et al. (Copsey). Applicants traverse this rejection.

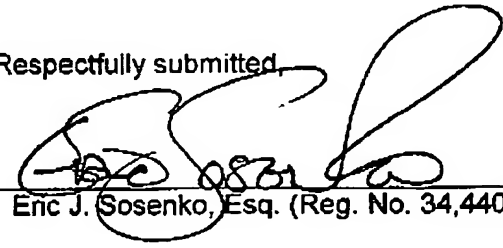

As amended, the present invention claims a method of forming a wall panel wherein (1) the first polymer sheet is formed with a plurality of reinforcement ribs and (2) the first polymer sheet is knitted to the second polymer sheet at the reinforcement ribs to form the wall panel. As seen in Copsey, the Copsey panel is joined together along its perimeter, and is not knitted together at reinforcement ribs formed in the first polymer sheet.

**Conclusion**

In view of the above amendments and remarks, it is respectfully submitted that the present form of the claims are patentably distinct over the art of record. Allowance of the claims is therefore warranted and requested.

Respectfully submitted,

March 20, 2006  
Date
